Professional Summary

Full Stack Developer and Cybersecurity Engineer with 3+ years of experience building production web platforms, automation systems, and AI-powered tools. Skilled in Next.js, React, TypeScript, Node.js, Python, Go, and PostgreSQL, with a solid offensive security background in web penetration testing and OWASP methodologies.

Technical Skills

Frontend: React, Next.js, Angular, TypeScript, JavaScript, Tailwind CSS, HTML5, CSS3, Responsive Design

Backend: Node.js, Express.js, Python, Go (Golang), Laravel, RESTful APIs, API Gateway, Microservices

Databases & Storage: PostgreSQL, NeonDB, Supabase, MySQL, MongoDB, SQLite

Authentication & Integrations: OAuth 2.0, Gmail API, Google APIs, JWT, REST APIs, WhatsApp Integration

AI & Automation: Generative AI, Google Gemini, AI-powered content generation, workflow automation, web scraping, browser automation

DevOps & Deployment: Docker, Vercel, Git, GitHub, CI/CD fundamentals, Cloud Deployment, Microservices Architecture

Cybersecurity: OWASP Top 10, Web Application Penetration Testing, API Security, Burp Suite, Nmap, Metasploit, Wireshark, Vulnerability Assessment, Security Auditing

Languages: Arabic (Native), English (Fluent), French (Intermediate)

Work Experience

ProClimaTechnique – Tunisia

Aug. 2026 – Present

Full Stack Developer

- Delivered a production business website for an HVAC and event air-conditioning rental company. Reduced booking response time by connecting a WhatsApp-integrated reservation flow directly to the site.
- Built dynamic booking forms that auto-structure customer data into WhatsApp messages. Cut manual data entry for the sales team by an estimated 70%.
- Optimized page structure and metadata for search visibility. Improved mobile usability score to 95+ on Lighthouse audits.

Technologies: Next.js, React, WhatsApp API, SEO

Tunisian Cloud – Tunisia

Jan. 2026 – Feb. 2026

Cybersecurity & AI Engineering Intern

- Designed a containerized microservices architecture for end-to-end vulnerability management. Centralized security operations across 5+ backend services behind a single API Gateway.
- Developed AI-powered analysis modules to classify security findings automatically. Cut manual triage time for analysts by an estimated 40%.
- Built an Angular frontend for project management, vulnerability tracking, and reporting. Enabled real-time dashboards used across the full security workflow.

Technologies: Go, Python, PostgreSQL, Angular, Docker, API Gateway

Doxso Technologies – Tunisia

Sep. 2025 – Nov. 2025

Web Application Penetration Testing Intern

- Conducted penetration tests on client web applications. Identified a critical Cross-Site Scripting vulnerability rated CVSS 8.8 plus multiple injection flaws.
- Delivered professional pentest reports with technical evidence and risk ratings. Provided remediation guidance for high-severity findings.

Technologies: Burp Suite, OWASP Top 10, Web Application Penetration Testing

FlexiFleetTech – Tunisia

Jan. 2025 – Mar. 2025

Full Stack Developer Intern

- Developed a vehicle reservation and fleet management application end to end. Connected a Next.js frontend to a Laravel backend through RESTful APIs.
- Implemented booking, vehicle, and user management workflows. Supported day-to-day operations for the company's active fleet.

Technologies: Next.js, Laravel, REST APIs, MySQL

Vision Software & Services – Sfax, Tunisia

Jan. 2024 – Mar. 2024

WordPress Developer Intern

- Developed a custom WordPress plugin with AI-powered content generation via third-party APIs. Automated page creation and streamlined the content publishing workflow.
- Tested and deployed plugin features across production environments. Implemented and maintained features throughout the development cycle.

Technologies: WordPress, PHP, REST APIs, Generative AI

Personal Projects

ApplyFlow – Personal Project

Jun. 2026 – Sep. 2026

AI-Powered Job Application Automation Platform

- Built an AI platform automating job discovery, CV parsing, and personalized email generation. Reduced the time required to prepare a job application from hours to minutes.
- Integrated Gmail API with OAuth 2.0 for secure email delivery. Developed a centralized dashboard for managing and tracking job applications.

Technologies: Next.js, Neon PostgreSQL, Gmail API, OAuth 2.0, Generative AI

DigiStock – Personal Project

Apr. 2026 – May 2026

Inventory & Fleet Stock Management Platform

- Built a centralized stock platform tracking warehouse inventory and vehicle stock allocation. Unified inventory data across warehouse, vehicle, and item levels.
- Designed dashboards for stock levels and low-stock alerts. Simplified inventory monitoring and stock management for operators.

Technologies: Next.js, Supabase, PostgreSQL, Vercel

POD Magasin – Personal Project

Aug. 2025 – Oct. 2025

Store & Inventory Management System

- Developed a full store management platform covering sales, purchases, and inventory. Automated stock updates across sales and purchase transactions.
- Integrated camera-based barcode scanning for mobile product lookup. Improved product identification and inventory operations on the sales floor.

Technologies: Next.js, PostgreSQL, Barcode Scanning API

Automated Social Media Video Studio – Personal Project

Apr. 2025 – Jun. 2025

AI-Powered Short-Form Video Generation Platform

- Architected an end-to-end AI video pipeline for TikTok, Reels, and YouTube Shorts. Automated script, voiceover, and asset generation to streamline short-form content production.
- Built a custom FFmpeg rendering pipeline with automated publishing workflows. Integrated browser automation and social media APIs for content distribution.

Technologies: Next.js, TypeScript, Google Gemini, FFmpeg, Playwright, TikTok API

Leadership & Community Involvement

Workshops

Jan. 2025 – Present

Cybersecurity Trainer

- Delivered ethical hacking and penetration testing workshops. Trained 100+ students and technical attendees across multiple sessions.

ISET Sfax

Sep. 2024 – Jun. 2026

President – Microsoft Tech Club

- Led club operations and organized hackathons and technical workshops. Coordinated activities and encouraged participation among students interested in software development and cybersecurity.

Independent

Jan. 2021 – Present

Cybersecurity Content Creator

- Produced educational content covering ethical hacking, cybersecurity concepts, and security tools. Built a recurring audience across multiple online platforms.

Education

ISET Sfax, Tunisia

Sep. 2023 – Jun. 2026

Bachelor in Information Systems Development – Graduated 2026

Relevant Courses: React Development, IT Security, Databases, Machine Learning

18 Janvier Jebiniana, Sfax

Sep. 2022 – Jun. 2023

Bachelor in Computer Science

Interests

Ethical Hacking | Video Editing
